

RUSKI LASHES

Product Disclosure Sheet

Peptide Lash Serum

Serums & Care · Copper peptide technology for visibly longer, denser-looking lashes

Peptide formulation

Key actives: Copper Tripeptide-1 · Myristoyl Pentapeptide-17 · Myristoyl Hexapeptide-16 · Biotinoyl Tripeptide-1 · Sodium Hyaluronate

Reference: RL-LGS-001

SUMMARY

Powered by Copper Tripeptide-1 (GHK-Cu) - our hero copper peptide for a denser, longer-looking lash line - with Myristoyl Pentapeptide-17, Myristoyl Hexapeptide-16 and Biotinoyl Tripeptide-1 to push visible length and fullness. Built without prostaglandin analogues (the class linked to iris pigmentation and eye-area changes).
